## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim Rejections - 35 USC § 103

Application/Control Number: 10/732,755 Page 3

Art Unit: 1751

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Reed et al, WO 97/06782.

Reed et al, WO 97/06782, discloses an ophthalmic formulation for cleaning and disinfecting contact lenses comprising 0.1-25% by weight of carboxymethyl chitosan, 0.01-10% by weight of an ophthalmic delivery agent, and an ophthalmic carrier (see page 14, lines 1-5 and page 15, lines 27-28), per the requirements of the instant invention. It is further taught by Reed et al that the composition has a pH of 6-8 (see page 16, line 17). Specifically, note Examples 1-8. Therefore, instant claims 1-12 are anticipated by Reed et al, WO 97/06782.

In the alternative that the above disclosure is insufficient to anticipate the above listed claims, it would have nonetheless been obvious to the skilled artisan to produce the claimed composition, as the reference teaches each of the claimed ingredients within the claimed proportions.

4. Claims 1-12 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hung et al, U.S. Patent No. 6,716,970.

Page 4

Hung et al, U.S. Patent No. 6,716,970, discloses a composition and method for cleaning and disinfecting contact lenses (see abstract) comprising a chitosan derivative, such as carboxymethyl chitosan (see col. 6, lines 41-54). It is further taught by Hung et al that the composition has a pH of 6-8 (see col. 8, lines 35-47), and that the composition may also contain carriers, such as surfactants, tonicity agents, viscosity agents, and preservatives (see col. 7, line 33-col. 8, line 47), per the requirements of the instant invention. Specifically, note Examples 1-28. Therefore, instant claims 1-12 are anticipated by Hung et al, U.S. Patent No. 6,716,970.

In the alternative that the above disclosure is insufficient to anticipate the above listed claims, it would have nonetheless been obvious to the skilled artisan to produce the claimed composition, as the reference teaches each of the claimed ingredients within the claimed proportions.

- 5. The examiner notes that the references cited in the International Search Report as "X" references are cumulative to the art rejections of record, and thus, have not been applied in this Office action in accordance with MPEP 706.02.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Mruk whose telephone number is (571) 272-1321. The examiner can normally be reached on Monday-Thursday from 7:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta, can be reached on (571) 272-1316. The fax phone
